

## Webinar

### PKI automation: on-premises, in the cloud, mobile

digital certificates today are a must for SSL, VPN, 802.1x, S/MIME and many other purposes. In our free webinar you will hear how you can manage PKI on-premises, in the cloud and for mobile devices. We will show you, how PKI automation can provide your users and systems with public or internal X.509 certificates reliably, securely and cost effectively.

These topics are waiting for you:

- PKI use cases
- 9 clicks for an enterprise PKI or one signature for managed PKI?
- Public or internal certificates?
- PKI variants: On-premises, cloud, hybrid
- Automation of enrollment, distribution, retrieval, revocation
- Certificates on all devices for end-to-end security
- Key risk: MDM system
- Distributing and managing certificates securely with Secardeo TOPKI

Speaker is our CEO Dr. Gunnar Jacobson who has more than 20 years of PKI experience.
